- A unique Volumenic Plus MC 12.0<sup>®</sup> compound stimulates the maturation and differentiation of fat cells and facilitates the lipids storage process. This results in the so-called cosmetic lipofilling, which causes an increase in the volume of adipose tissue in the breasts and is a great alternative to aesthetic medicine procedures.

Dr Tomasz Jeżewski MD, PhD Signature Series

#### FOOD SUPPLEMENT

 This dietary supplement, developed for NUTRICODE in collaboration with Dr. Tomasz Jeżewski, features two of the most effective active forms of vitamin B12 - methylcobalamin and cyanocobalamin, which are uniquely capable of crossing the blood-brain barrier. This formulation significantly improves the functioning of the nervous system and plays a crucial role in the production of important neurotransmitters, helping to maintain mental wellbeing. It supports the alleviation of symptoms associated with neurosis, depression, and irritability, aids in combating insomnia, enhances concentration, and boosts overall mood. Additionally, it provides an energy boost and helps reduce fatigue. The supplement regulates homocysteine levels, a key amino acid that, when elevated, contributes to cardiovascular diseases. Furthermore, it may help prevent type I and II diabetes, psoriasis, thyroid disorders, and Alzheimer's disease. This product is especially essential for vegetarians and vegans due to the lack of cobalamin in plant-based diets.

# **BAD CHOLESTEROL** Dr Tomasz Jeżewski MD, PhD Signature Series

#### FOOD SUPPLEMENT

Bad Cholesterol Solution offers three powerful ways to help lower bad cholesterol:

- First, it inhibits the synthesis of bad cholesterol, while protecting the good cholesterol your body needs to remove the harmful types from your bloodstream. By focusing on the harmful forms, you safeguard your heart without losing the benefits of good cholesterol.
- Second, it helps maintain oxidative and metabolic balance. Lowering total cholesterol can sometimes lead to unwanted side effects, such as fatigue or hormonal imbalances. By selectively targeting bad cholesterol, you reduce these risks, promoting overall well-being.
- Finally, it partially inhibits the absorption of bad LDL cholesterol in the intestines, adding another layer of protection.
- With these mechanisms working together, BAD Cholesterol Solution effectively reduces the risk of atherosclerosis, the number one cause of heart disease. This strategy not only protects your heart, but also supports your long-term health.

These vitamins work synergistically to promote strong bones, a healthy heart, and overall vitality. Vitamin D3 plays a crucial role in regulating phosphorus and calcium levels, maximising absorption from food, strengthening bones, and reducing the risk of fractures and osteoporosis. It also boosts immunity against viral and bacterial infections. Meanwhile, vitamin K2 activates proteins that support bone mineralisation and protect blood vessels from unwanted calcium buildup, effectively directing calcium to bones and teeth and preventing heart disease and atherosclerosis.  $16.5 \text{ g} \mid 801083 \mid$

WAIT UNTIL YOU FEEL THE INGREDIENTS A modern vanilla-themed scent that is rich, balsamic, woody and spicy. This is a collection for someone with discerning taste who appreciates the finest quality in life.

The Golden Edition fragrances contain ingredients that are more refined and sophisticated compared to their counterparts, the Pure Royal perfumes, and they have a higher number of Personal Points.

#### "THERE'S SOMETHING ABOUT THE NIGHT, IT'S ANOTHER WORLD, ANOTHER VERSION OF WHO

YOU ARE..."

Pure Royal Golden Edition no. 505 is a fragrance whose main character is the rarest raw material used in perfumery, vanilla. The smoky scent of its seeds takes on a new character here, transforming into something unexpected, less sweet, but more refined. Combined with cedarwood, chaste, musk, it becomes a bit dark, but still intoxicating and rich. Just a small amount is enough, which comes to life with the warmth of the body, keeping the fragrance for hours.

Home Ritual scented candles meet strict requirements of the German RAL standard in terms of:

- scent intensity
- optimal burning behaviour
- wick quality a strong cotton wick of suitable thickness, resistant to breaking and drowning
- minimal smouldering, which does not pollute the airways
- reduced soot, which ensures the candle looks beautiful when used

# HOW TO PROPERLY LIGHT THE CANDLE

Before each lighting, cut the wick to a height of about 5 mm, so that the flame will be stable and the candle will not smoke. Burn it for 3 to 4 hours – this will prevent tunnelling (the wax will melt evenly), and will also allow the candle to develop a full bouquet of aromas.

**NEON GLOW** 

PAINTS WITH

A BRUSH

- FLUORESCENT

FACE AND BODY

The colour of ordinary pigments depends only on the reflected light, but neon fluorescent pigments combine the light emission phenomena caused by ultraviolet light and the stimulation of reflected visible light, respectively. It is possible to obtain vivid colours with high luminous effects, lightness and saturation. Highly concentrated colored powders emit visible or invisible light as a result of the action of short wavelength light. The pigmented surface must be exposed to a UV lamp or a diode with ultraviolet light to provide a special glowing effect. The most important feature of fluorescent colours is that they glow, are vivid and noticed much faster than regular colours.

### VALUES

- This neon body paint is the perfect accessory to spice up parties, festivals, evenings, dressing up, going out with friends, clubs with UV light
- Each pack contains a rainbow selection of colours in various saturations and shades: red, orange, yellow, green, blue, purple, pink
- For adults, teenagers and children
- · Colour pigments reacting to UV rays are non-toxic and non-radioactive
- UV powders are made of substances that do not harm the environment or the health of the user (they can even be used by children)
- UV pigments do not lose their colour properties and intensity over time. The pigments feature vivid colour, strong fluorescent effects, good dispersity, and great particle fineness
- Easily removable with soap and water
- Excellent value for money as a little bit of paint goes a long way

### • Content in the cup: ca 1,1 g

- EASY TO USE
- Using circular motions, with the help of water and a brush, loosen the top layer of the colour to obtain a smooth and homogeneous, creamy mixture
- 3. Apply multiple layers to skin for best glow under UV light
- Easy remove with soap and water

# EFFECTS

Express clear and beautiful colours:

- In daylight neon colours
- In the dark no glow
- In the dark with UV light –
   Vibrant + Bright + Neon UV Glow

# TIP

The paint is most commonly applied by fingers, but it can also be applied with brushes or sponges. No limits!

Glowing neon body paints are based on fluorescent pigments. They are powders in a finely divided state with a distinct colour and fine particles. However, to obtain the luminous effect, the pigmented surface must be exposed to a UV lamp or a diode with ultraviolet light. Since most of the glow we see is actually reflected light, the brighter the background colour, the brighter the glow appears. It is based on the emission of light waves through an excited molecule or atom, for which phosphors are responsible. Therefore, fluorescence is classified as photoluminescence. Light is only emitted when the pigment is exposed to the rays. When such rays stop being emitted, the effect disappears instantly. The colour remains vivid, but without the glow effect.
